1. Story of Corex

The Team around Corex consists of selected Crypto and Forex traders, who have long experience in the fields of cryptocurrencies and already prove their worth.

The idea of Corex was to make those traders accessible to everyone.

Common knowledge is, that professional traders are very expensive and that you need to have plenty of capital available, if you want to consult a skilled trader.

Not so with Corex.

Our new founded concept saves you those costs and enables you access to a path of a profitable future with the help of top traders on the Crypto- as well as on the Forex market. Corex created a way to halve the risk by spreading capital across two markets, but with increasing profits.

2. About Corex

Cryptocurrencies triggered a real hype in 2017.

The over 1,500 cryptocurrencies which appeared and have grown since then are not to be underestimated as their technology will determine and change our lives in the future.

The Blockchain technology, which our work is based on, is a new found concept which is now also used in many other industries and by now is just at the beginning of its possibilities.

If you want to participate in the success of Cryptocurrencies, you are exactly right with us. Our platform grants you access to different possibilities to be successful with Cryptocurrencies.

Anyhow, please be aware of the risk and do not use capital whose loss you cannot absorb.

The fastest and most comfortable way to trade Cryptocurrencies is to invest in a platform where professionals generate your profits.

We offer Cryptocurrency trading alongside Forex and arbitrage trading.

This is your and our turn!

3. Why should I invest?

Our platform offers you a simple and lucrative investment concept. The safety of our customers is the top priority. We highly believe that with a larger spread of invested capital we can assure more security. In our opinion pure investment in Cryptocurrencies would be too risky. We think, that the more markets you use and the more often you spread your capital, the lower is the risk of a total loss or washout in the end.

With our 3WAY concept, which splits into Forex, Crypto and arbitrage trading, we offer our customers a very secure and solid investment solution.

4. Vision

It's our vision to grant people the possibility to generate profits even in difficult market phases.

The goal of our project was clear from the beginning. There is highs and lows in every economy.

So we wondered: How can you develop a long-term project?

This is where Corex occurs and comes to life as one of the most efficient investment opportunities with Cryptocurrencies.

The Crypto technology opens possibilities to build and found a crowdfunding project completed within 17 months. That was what we had pictured too.

We have been gathering experience in the entire trading area since 2016.

So you might question: What exactly makes us so strong?

We always have had the opportunity to work in two different markets, even if one market had reached a low point, we were able to leverage it with the profits of the other market.

And even if both markets had bottomed out, our additional arbitrage trading bot could generate huge profits too. Building on this concept we are able to generate profits in all situations.

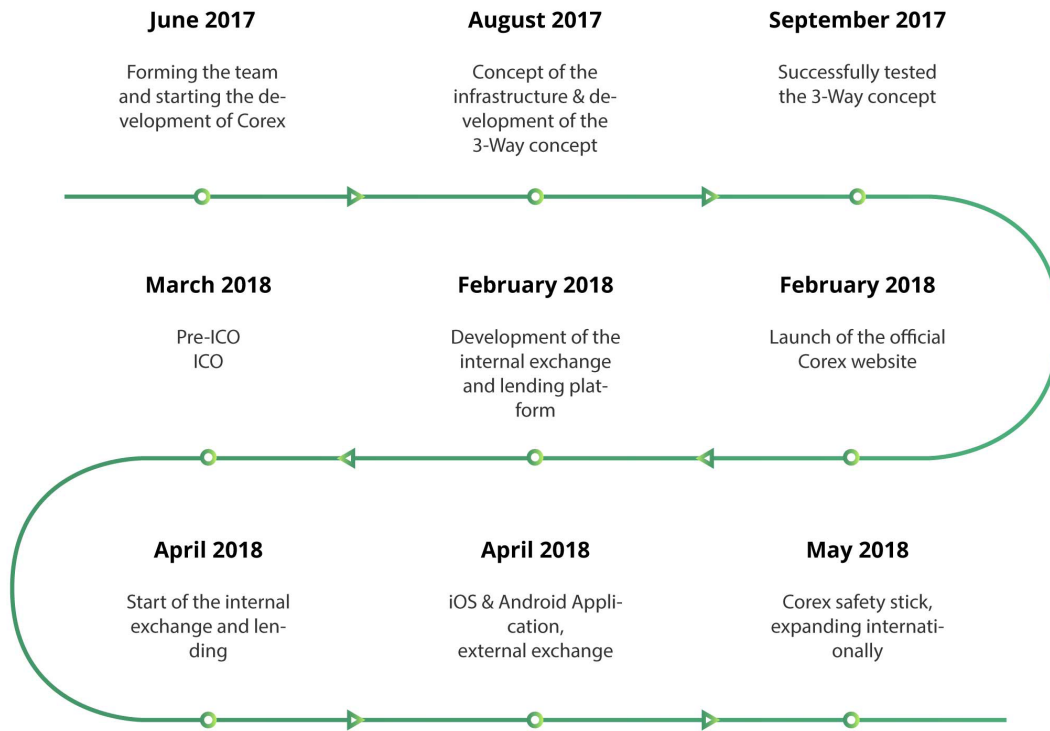

5. CorexCoin

The CorexCoin is a new Cryptocurrency that allows you to conduct transactions quickly, anonymously and for free. The CorexCoin is a bank- and government-independent transaction tool that can be dispatched within seconds. The idea for Corex was born in 2016. The number of coins available is limited to 25 million pieces. The CorexCoins build on a deflationary system! CorexCoins are not centrally managed, but based on networks (Blockchain) where all information is exchanged and each transaction is stored and distributed publicly. Our coin is based on the ERC20 Blockchain and this concept can not be copied. It is impossible to hack, modify or falsify CorexCoins. Due to the Blockchain technology multiple servers would have to be hacked at the same time to make it redundant which, in any case is not possible. CorexCoins are safe and independent!

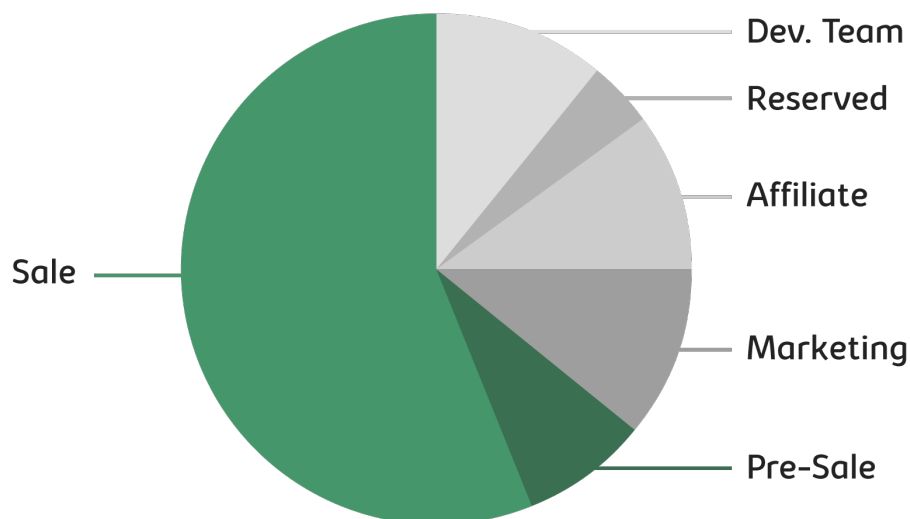

6. Roadmap

7. Token Distribution

For us it was important to handle the coin distribution in ways fair for everyone. We decided to give 64% of the total coins supply to our customers.

Pre-Sale 8%	2 Mio. COREX
Sale 56%	14 Mio. COREX
Dev. Team, Founders 11%	2.75 Mio. COREX
Marketing 11%	2.75 Mio. COREX
Affiliate program 10%	2.5 Mio. COREX
Reserved Coins 4%	1 Mio. COREX

8. Token Specification

Coin Name:	Corex
Total Supply:	25000000
Decimals:	8
Website:	http://corexcoin.io/
Symbol:	COREX
Blockchain:	Ethereum ERC-20
Crowdfunding Coins Available:	16000000
Accept Contributions:	BTC & ETH

9. Pre-ICO

We are issuing 16 million CorexCoins, of which up to approximately two-thirds will be available in a crowdsale. During a PRE-ICO which is scheduled to run from the 8th of March 2018 to the 10. March.2018, we are selling a maximum of 2 million CorexCoins at a price of 0,29 \$ each.

Unsold PRE-ICO coins, will be transferred to the ICO.

Pre-ICO funds will go into marketing the main ICO. We are planning multiple approaches of digital marketing such as banner ads, press releases, signature campaigns and social media.

The Pre-Sale starts at 06:00 pm. CET (Central European Time)

Minimum investment - 20\$ = 68 CorexCoins

Maximum investment - 7000\$ = 24,137 CorexCoins

10. ICO

The ICO will run from the 14th of March.2018 to the 30nd of March 2018.

The selling price during ICO will be based on 5 separated periods, starting with 0,65\$ per coin. The price of a CorexCoin increases after every sale. The unsold Coins, if any, will be destroyed.

IMPORTANT:

All investments will be purchased through Coinpayments. Thus we have a regulation of the „Big Whales“. There is a certain limit to how many Coins each individual person can buy.

In addition, there is a certain limit to how much bulk purchase (\$ 2000- \$ 7000) can be made.

The Pre-Sale starts at 06:00 pm. CET (Central European Time)

Minimum investment - 20\$ = 30 CorexCoins

Maximum investment - 7000\$ = 10,769 CorexCoins

11. ICO Pricing Overview

Sales	Date	Available Coins	Price per Coin
PRE-SALE	March 8th 2018	2,000,000	0.29\$
SALE 1	March 14th 2018	3,000,000	0.65\$
SALE 2	March 18th 2018	3,000,000	0.75\$
SALE 3	March 22th 2018	3,000,000	0.85\$
SALE 4	March 26th 2018	3,000,000	0.95\$
SALE 5	March 30th 2018	2,000,000	1.05\$

12. Affiliate program

You can earn additional COREX coins with our affiliate program. The Corex affiliate program is designed to give you 4 lucrative levels to earn additional commission. Starting with 7% commission of the whole investment of your direct recommendations (Tier 1) down to 1% for investments on the fourth level (Tier 4).

Level	Commission
Level 1	7%
Level 2	4%
Level 3	2%
Level 4	1%

13. Trading

What is Forex?

The Forex market is a decentralized international market for buying and selling foreign exchange.

Forex is the largest financial market in the world and is also known as Foreign Exchange, FX or Foreign Exchange Market. The Forex market helps companies and individuals to convert one currency into another. To a lesser extent, we are all involved in currency trading when we go abroad and exchange the currency of our home country to the currency we need abroad. But currencies are not just traded by individuals and companies, Forex trading is also important for financial institutions, central banks and governments. It facilitates international trade and international investment by allowing companies which make profits in one currency to pay for goods and services in another currency.

Why trading foreign exchange?

Forex trading allows you to speculate on the relative strength of one currency against another currency. The Forex market is the most popular financial market in the world and the daily trading volume is of immense extent. Most involved in trading are speculators who buy and sell currencies based on daily price fluctuations. The estimated daily turnover of foreign exchange trading is over 4 trillion US dollars worldwide. Business and financial transactions account for only 10% of this trading volume. The large number of traders and the immense amount of currencies traded daily make the foreign exchange market extremely liquid. This means that anyone can easily get into this market - you can usually buy one currency on demand because another trader in the world likes to sell them, or vice versa.

There is no commission system on the foreign exchange markets that complicates other markets. Usually you only need a small deposit in the beginning. The transaction costs are low. You can trade around the clock and benefit from high leverage.

How does a Forex trade work at Corex?

Foreign exchange rates are always given in currency pairs. This is because you are indeed buying one currency while you sell another.

Each currency in this currency pair is identified by a three-digit currency code, such as: GBP / USD (British Pound versus the US Dollar) or USD / JPY (US Dollar against the Japanese Yen). The first currency of a pair is called the base currency. It is sometimes referred to as the primary currency. The second currency of a currency pair is called the currency of the currency or the counter currency. A foreign exchange rate indicates how much quote currency is needed to buy one unit of the base currency. For example, if you see GBP / USD = 1,63792, it means that a pound is worth \$ 1,637992. To buy a pound, you would need to sell \$ 1,637992. If you were to sell a pound, you would receive \$ 1,637,992.

Arbitrage Trading

Crypto arbitrage trading is a way to make money trading coins with less risks than speculative Crypto trading or day trading. It is a known fact that trading Cryptocurrencies is a risky business. The price can swing wildly, and nobody knows for certain what the price will be from day to day. However, if you know the Crypto market, it is possible to read the market signals and make trades based on what you think might happen.

This could make you money as it can lose you money, in essence it's a gamble. Crypto arbitrage trading though, is one of the best ways to make money trading Cryptocurrencies without having to worry as much about sudden price movements that could lose you money. It is a quicker and a safer way to trade than basing trades on what the chart is "telling you". If you are serious about trading Cryptocurrencies and making money, having coins on as many different exchanges as possible, and having yourself setup to buy or sell coins on as many different platforms as possible is an excellent option. Why? Because it enables you to take advantage of the best prices on any given platform at any time.

Cryptocurrency Trading

As important as technical and fundamental analysis may are, for day-to-day trading, however, a more fundamental approach is important: How do I invest money so that I end up with as much plus as possible in the end?

The problem is: Even if price, trend, indicators, or other signs of a particular development speak, a course can go the other way. This is not simply due to their own failibility, but also to spontaneous developments that were unpredictable. Especially small altcoins show a volatility that is hardly predictable over medium-term time scales. In that respect, it is clear that it takes more than knowledge of indicators, etc., not just to gamble. Therefore, it is important to have traders you can rely on. Our traders have long experience in the trading market and manage to earn high returns through certain strategies. We provide you with our traders without high costs, which normally accrue to such top traders.

14. Lending

Lending means to invest your own COREX coins or Bitcoins to get a daily return. This option is perfect for passive investors. You can see the guaranteed profits on the table in our Whitepaper. The maximum interest rate is 49% per month. This investment allows you to profit from our 3WAY trading concept. The capital is stored for a certain amount of time, which allows a better cash flow. You will receive your capital and your profits back after 53 to 186 days, depending on which package you have selected.

Lending Amount	Guarantee	Up to	Duration
100\$ - 1,000\$	0.10%	49.00%	186 days
1,001\$ - 5,000\$	0.15%	49.00%	155 days
5,001\$ - 9,000\$	0.20%	49.00%	124 days
9,001\$ - 40,000\$	0.25%	49.00%	93 days
40,001\$ - 90,000\$	0.30%	49.00%	62 days
90,001\$ - up to	0.35%	49.00%	53 days

15. Lending Affiliate

We pay a percentage commission for the lending capital in our Corex lending platform. We have designed an attractive 4 level system for our lending program. For users registering over your referral link, you will receive these commissions:

Level	Guarantee
1	7.00%
2	4.00%
3	2.00%
4	1.00%

16. Staking

The platform automatically increases your amount of tokens depending on how big your balance is. You can see the exact percentages in the table in our Whitepaper. The more you hold, the more you earn. Staking begins once you keep your COREX coins in your special wallet, meaning that you generate interest on your COREX coins. It happens in the background, which means you do not have to keep your laptop running.

Duration	Interest
1st Year	9% monthly
2nd Year	6% monthly
3rd Year	4% monthly
4th Year	3.5% monthly

17. Wallet Application

“Easy to use – easy to handle - and easy to invest”

An important aspect is the simplicity of the application.

On the wallet application, it has been made very easy for the customer to buy and sell the coins. A clear platform makes it possible to follow all courses and you can change your CorexCoins to BTC.

A two factor authenticator is used for the sign up.

The trial version of the Corex Application will soon be available on Android and iOS.

18. Internal Exchange

The internal exchange is one of the most important aspects of the Initial Coin Offering. An internal exchange is the first step in making a coin a reality. It is important to create a base for a stable price. For our customers too, this is very important in order to be able to exchange their CorexCoins into BTC. The internal exchange will be featured on our dashboard and will be available to our customers, starting from the second week after the last sale.

19. Our goals for the future

External Exchange:

Get in touch with big exchanges

Corex safety stick:

Creating our own hardware wallet

The biggest Lending platform:

Vision to top all the other lending platforms

Big Event:

Kick-off event in Singapore

Global Presentations:

Presentations from our business model around the world

Cooperations:

Cooperate with financial companies and business partners
